Industrial Applicability (IA) Claims 1-8 _____ YES
 Claims NONE _____ NO

2. Citations and Explanations (Rule 70.7)

1) Claims 1-8 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a dental model tray that is made entirely of a polymeric material comprising a substantially planar base that forms the floor upon which dental casting material is poured, a side wall extending upwardly from a perimeter of the base so as to form a cavity having an open top facing upwardly from the base, and a thin membrane-like connector member which is formed integrally with the perimeter of the base and a lower side edge of the side wall and thus connects the perimeter of the base with the lower side edge of the side wall, the connector member being frangible and easily broken so that the side wall can be torn away from the base and discarded after dental casting material hardened in the cavity formed by the side wall.

2) Claims 1-8 meet the criteria set out in PCT Article 33(4), and thus a dental molding tray is industrial applicability because the subject matter claimed could be made or used in industry.
